- Node Js
- Express Js
- Nest Js
- MongoDB

LANGUAGE

English (Professional working proficiency)

Azerbaijani (Native proficiency)

Turkish (Professional working proficiency)

SUMMARY

I have over 1 year of experience in programming. I have contributed to the development of ERP and CRM systems, payment integrations, and multi-role platforms. I have also supported my team in both frontend and backend during several hackathon projects. I am eager to learn, quick to adapt to new technologies, and an active team player. My goal is to take part in innovative projects to enhance my professional growth and add value to the company.

WORK EXPERIENCE

Uniser Group MMC

Baku, Azerbaijan

12/2024 to present

Junior Frontend Developer

- Development of multi-role and multi-level access systems with advanced user permission management
- Integration of SIMA electronic signature system for secure authentication and document signing
- Implementation of online payment systems and integration with government payment services
- Creation of management dashboards, analytical reports, and data visualizations
- Optimization of RESTful API communication between frontend and backend services

Smart Business LLC

Baku, Azerbaijan

04/2024 to 08/2024

Front-End Developer

- I worked as part of a team on developing a POS and inventory management system for stores and restaurants.
- I implemented the frontend using React.js, creating a responsive and user-friendly interface.
- I collaborated closely with backend developers and team members to deliver a fully functional and efficient system.

Invawe

Baku, Azerbaijan

07/2024 to 09/2024

Frontend Developer(intern)

- Developing and maintaining an internal company system using Angular to streamline internal processes and enhance productivity.
- Collaborating closely with backend developers and UI/UX designers to create a cohesive, scalable, and efficient system tailored to the company's needs.

ACHIEVEMENTS

Matrix Academy

Frontend Development

I have completed frontend training, gaining knowledge of both core web technologies and modern frameworks. I have acquired hands-on experience with several technologies widely used in real-world projects, including HTML, CSS, Bootstrap, SASS/SCSS, JavaScript, React, Redux, TypeScript, Firebase, Git, and GitHub.

WORLD SKILLS 2025

Web Development Competition

Competed in both frontend and backend tasks across 4 modules within 2 days. Ranked 5th place among 20 finalists selected from 130 participants. Personally developed full-stack solutions under time pressure using HTML, CSS, JavaScript, Angular, NestJS, and MySQL.

PROJECTS

GLLOC (Global Logistics Operations Center)

GLLOC is designed to simplify logistics operations and freight car tracking by providing real-time visibility and control. We ensure accuracy, transparency in every shipment, helping businesses manage their logistics with confidence. The system centralizes all operations, from shipment tracking to payments and reporting, in one reliable solution.

Skills: Angular, TypeScript, RxJS, ExcelJs, CibPay

Budget Management System

It is designed for the internal use of the Ministry of Education of the Republic of Azerbaijan. The system also enables the management of financial operations between vendors and educational institutions. Its main goal is to centralize budget processes while enhancing transparency and efficiency

Skills: Angular, TypeScript, RxJS, ExcelJs, SIMA

Servis333

333 Servis offers professional repair and installation services for air conditioners, combi boilers, and refrigerators. Through the website, users can explore services, view completed projects, and easily request a technician. The platform also provides company details, contact information, and location for customer convenience.

Skills: NestJS, TypeScript, Typeorm, Multer, MySQL
